

Enterprise Solution

LEISURE

DELIVERING SERVICE THROUGH TECHNOLOGY

Xn Leisure's Flagship Membership and Booking product, TLMS Dimension, is a centrally hosted enterprise product which supports a number of key features more usually associated with the retail environment. Dimension has tremendous power and capabilities utilising the latest .Net and Web services technology, coupled with proven data transport technology used in 81 out of the top 100 fortune companies.

The objective of Dimension is to provide a robust, reliable, centrally-hosted solution which will enable sites to operate on an individual basis, but with the added advantage of managing the member data estate-wide without the loss of autonomy or service locally, where relationships are managed. The centralisation of BACS provides an immediate cost saving while providing the central control of monthly DDs.

As the next level up from Xn Leisure's core product Advantage, Dimension shares data to provide the flexibility to 'Master' data centrally and replicate down to a site level on a read-only basis. Using .Net and Web-services advances the technology base of

core Xn Leisure products. A thin client application based on established web-technologies, Dimension will provide central control which will be broadcast to sites using a bespoke XML-based messaging system – resilience will be built in. Data can be consolidated until a connection is available and sent via the messaging system to allow sites to 'catch up'.

Data

The following list details data which will be 'mastered' centrally and will be available at site:

- Prospects – prospect data and associated tasks, group wide
- Memberships – memberships scheme management
- Members – member management
- Activity Codes – centralised mapping for reporting
- Lookups – payment methods, occupations, promotions etc
- VAT Rates – standard, exempt etc
- Currency Details – GBP, Euro
- Financial Periods
- Stock Items

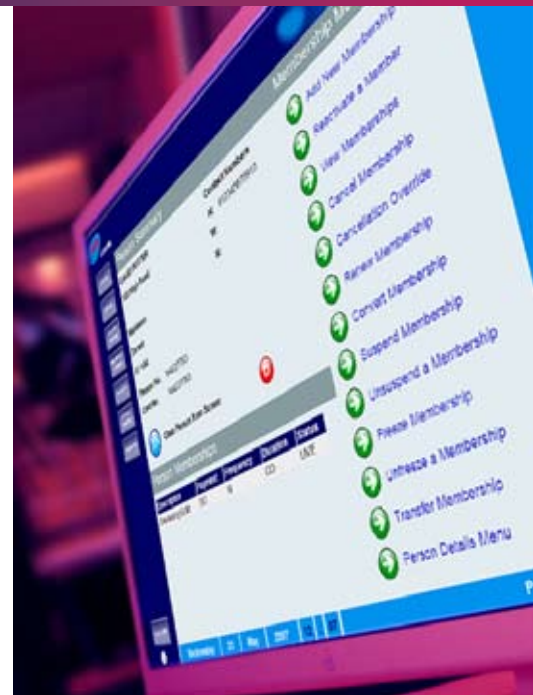

Overnight, individual site data will be returned to the central dimension database and enable a complete group-wide view to be available for interrogation the following morning, post the previous day's trading.

Xn Leisure TLMS Dimension offers a number of product benefits to the leisure operator. These include:

- Centralises data
- Reduces site administration
- Helps standardise processes
- Minimises IT management
- Can be used via ADSL, therefore reducing comms costs
- Provides up to the minute real-time reporting

Benefits of Dimension:

- Central management of memberships & prices
- Central member management
- Central BACS – IP interfaces to support DDs, AUDDIS, ADDACS & ARRUDS
- Central reporting
- Central control of estate-wide data
